12. Navigating Reflections (1/2)

Reflection: Brain Development

[My Notes](#) | [Previous](#) [Next](#)

Instructions

As part of Saroj Ghoting's workshops, she shared information about early literacy asides.

An **aside** is an intentional tip that articulates to adults the connection between what is done in storytime and the skills used in reading. An aside gives parents and caregivers information to support the growth and development of their young child. These are examples, explanations, or just knowledge to empower caregivers. An aside may help caregivers think of activities to do with their children to extend the storytime beyond the library, as well as help them understand how these activities are supporting learning.

Please watch the following video for some examples of effective versus ineffective asides.

As a reflection activity and to share with caregivers in future library programs, practice writing an effective aside based on the brain development information presented.
